Rev. 1999

Buckingham County is located in the central Piedmont Plateau. Formed from part of Albemarle in 1761, the county was named after the town of Buckingham, England.

The area of Buckingham totals 371,771 acres, of which 75,854 acres, or 20 percent, was in farms in 1997. According to the **1997 Census of Agriculture**, there were 370 farms in the county averaging 205 acres each in size. The average value per farm, including land and buildings, was \$329.399.

The James River forms the northern and northwestern boundary of the county, and the Appomattox River borders the area on the south. Altitudes generally range from 300 to 700 feet, but there are several small mountains. Willis Mountain, for example, is measured at 1,159 feet, and Spear Mountain is 1,550 feet. Temperatures in Buckingham average a moderate 37 degrees in January and 76 in July. The frost-free growing season averages 168 days, typically falling between April 29 and October 14. While the total precipitation for the year averages nearly 41 inches, heaviest rainfall occurs in July with 4.27 inches and in August with 4.43 inches.

Agriculture is an integral part of Buckingham's economy, and cash farm income totaled 17.2 million dollars in 1997. Of this total, over 96 percent came from livestock, poultry, and related products. Indeed, poultry continues as the county's leading agricultural enterprise, contributing over 49 percent of this total. Cash income from cattle and calves added 11 percent, crops 4 percent.

Since over 80 percent of the county is forested and almost half of all farmland is woodland, it is not surprising that Buckingham's economy is also closely tied to forestry. The production of saw timber, railroad ties, and other items provides an important source of income and employment. Other jobs are provided by the area's thriving mineral industry, as Buckingham slate is well known throughout the country as superior roofing material.

Since there are no large urban centers in the county, the population of Buckingham is classified as mostly rural-urban, and in 1990 totaled 12,873. The total gross personal income that year was \$168.1 million, or an average of \$13,056 per capita.

⁻⁻⁻⁻ Represents zero.

^{1/} Due to changes in definition and wording of questions, figures for "cropland pasture" and "other pasture" are not always comparable from the Census. Acreage beginning with 1964 refer to pastureland and rangeland, other than cropland and woodland pastured, on farms with sales of agricultural products of \$2,500 and over. 2/ Beginning with 1964, agricultural operations under individual management with annual sales of \$1,000 or more. NA Not Available.
